

# What's New on the Web?

## Fleet Buyer's Guide ([www.cities.doe.gov/vbg/fleets](http://www.cities.doe.gov/vbg/fleets))

Your old favorite, the Fleet Buyer's Guide, has been completely redesigned. The site now resembles its sister site, the Consumer Buyer's Guide and has improved functionality. You can come to this site to learn about:

- The benefits of purchasing alternative fuel vehicles
- Available light- and heavy-duty vehicles with costs and specifications
- Up-to-date incentives and laws, fueling locations for alternative fuels, and dealer information

## Educational Tools for Students and Teachers K-12 ([www.afdc.doe.gov/educational\\_tools.html](http://www.afdc.doe.gov/educational_tools.html))

There are so many valuable alternative fuel Web sites available to students and teachers, but until now, you had to search the Internet in a variety of ways to get that information. Now, we have developed a one-stop-shop for students and teachers to learn about educational alternative fuel resources. The new pages live on the Alternative Fuels Data Center's Web site and include links to:

- Teaching Materials
- Fun Activities
- Helpful Links
- Competitions

## Niche Market Information ([www.ccities.doe.gov/afvinfo\\_niche.shtml](http://www.ccities.doe.gov/afvinfo_niche.shtml))

Select niche markets have been highlighted on the Clean Cities Web site. We have detailed information to help fleet managers implement alternative fuel vehicles in specific niche markets. You will find publications, success stories, funding information, contacts, and available vehicles. The niche markets highlighted include: Airports, School Buses, Transit Buses, Shuttle Buses, Refuse Haulers, and Heavy-Duty Trucks.

## Alternative Fuels Information ([www.afdc.doe.gov/altfuels.html](http://www.afdc.doe.gov/altfuels.html))

Alternative fuels information has been on the AFDC site since its inception. However, we have recently taken a fresh look at the pages, updated the content, and added some new features. Now you can find:

- A chart comparing fuel attributes and characteristics for all alternative fuels as well as gasoline and diesel
- Infrastructure development resources, publications, and fuel properties
- Expanded information on hydrogen

## Infrastructure Resources ([www.afdc.doe.gov/altfuel/infrastructure.html](http://www.afdc.doe.gov/altfuel/infrastructure.html))

When installing new alternative fueling stations for fleet applications, there is much to consider. We have recently developed a new section on the AFDC Web site that provides links to information including:

- Fueling appliances and fuel availability
- Training, contacts, publications, and success stories
- Standards and safety
