NEPA DETERMINATION**

RECIPIENT:Virent Energy Systems, Inc.

STATE: WI

PROJECT TITLE : Cellulosic Biomass Sugars to Advantaged Jet Fuel: Catalytic Conversion of Corn Stover to Energy Dense, Low Freeze Point Paraffins and Naphthenes

Funding Opportunity Announcement Number	Procurement Instrument Number	NEPA Control Number	CID Number
DE-FOA-0000337	DE-EE0005006	GFO-0005006-001	EE5006

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

- A9** Information gathering (including, but not limited to, literature surveys, inventories, audits), data analysis (including computer modeling), document preparation (such as conceptual design or feasibility studies, analytical energy supply and demand studies), and dissemination (including, but not limited to, document mailings, publication, and distribution; and classroom training and informational programs), but not including site characterization or environmental monitoring.
- B3.6** Siting, construction (or modification), operation, and decommissioning of facilities for indoor bench-scale research projects and conventional laboratory operations (for example, preparation of chemical standards and sample analysis); small-scale research and development projects; and small-scale pilot projects (generally less than two years) conducted to verify a concept before demonstration actions. Construction (or modification) will be within or contiguous to an already developed area (where active utilities and currently used roads are readily accessible).

Rational for determination:

DOE is proposing to provide federal funding to Virent for a laboratory scale research and development project intended to develop an integrated process to convert lignocellulosic feedstock into hydrocarbons. Work will be completed at three existing facilities. The scope of work includes computer modeling, fundamental research and development, process development, techno-economic analysis and project management. No genetically modified organisms will be used or created as part of this project. CX A9 and B3.6 apply.
